

JET-LIGHT DOME ACCESSORIES

WEATHER PROTECTION

JET-wind and rain automatic for ventable daylight elements

JET-SMARTCONTROL-LIGHT

Jet-wind and rain automatic for office, municipal and residential buildings:

- External 230 V weather station (sensor unit)
- For the collection of information on wind speed, precipitation, outdoor temperatures and brightness, and has GPS reception as well for the date, time and calculation of the position of the sun
- For the power supply of a 230 V drive line
- Central operating and control panel with five-inch LCD touchscreen display (up to 4 centres can be learnable at the weather station) battery-operated (micro USB) radio unit
- to collect information on the internal room temperature
- with 1 radio channel for communication with the weather station
- with 15 radio channels for communication with motor control units for 230 V ventilation or shadowing drives or e.g. sources of light, etc.
- With 32 radio channels for the integration of e.g. sensors (e.g. to collect information on humidity, CO₂-content, temperature in spaces or radio buttons or hand-held radio remote controls)

Possible applications:

Ideal for the smart control of

- comfort drives for ventilation or shadowing in smaller office, municipal and residential buildings, for example

Advantages:

- More comfort with intuitive operation
- Relatively low installation effort
- Suitable for retrofitting

Options:

Expansion with a WLAN interface

- that can be controlled by smartphone app (data communication only in your immediate surroundings – not with external web servers)

Overview of functions

JET-wind and rain automatic (W+RE B/4)

Weather switching device for ventilation systems:

- Adjustable wind speed
- Change between automatic or hand operation
- Optical display of the operating status
- Short-term ventilation during rain
- Central closing function
- Designed for four ventilation groups
- Optionally expandable
- Combinable with JET-SHEV systems

Wind-rain sensor:

- Optional mounting accessories for:
 - Wall mounting
 - Ceiling mounting
- The installation of continuous rooflights

JET-wind and rain automatic
More safety in case of wind and rain
