

## JET-STAIRCASE 24 V SHEV SET

### For fire prevention and daily ventilation

JET-staircase 24V SHEV set  
Connection possibilities and reports

#### SHEV activation via:

- SHEV switch
- alternative smoke detector/heat detector
- fire alarm system (BMA)

#### Ventilation function via:

- ventilation switch
- alternative wind/rain sensor
- temperature dependent ventilation

#### Reports:

- SHEV activation and collective fault indication, optical and acoustical via SHEV switch
- SHEV activation and fault indication for network, battery, motor circuit, smoke detector circuit and SHEV switch circuit, optical in the central

#### Options:

- potential-free SHEV and fault notification
- potential-free relaying of a wind/rain release
- time-dependent closing of the ventilation function (0–30 min)

Basic configuration JET-TR 24V SHEV set for JET-light dome

JET-SHEV motor control central including accumulators for backup power supply

SHEV spindle motor opener including console

SHEV DIN main release switch

SHEV DIN secondary switch

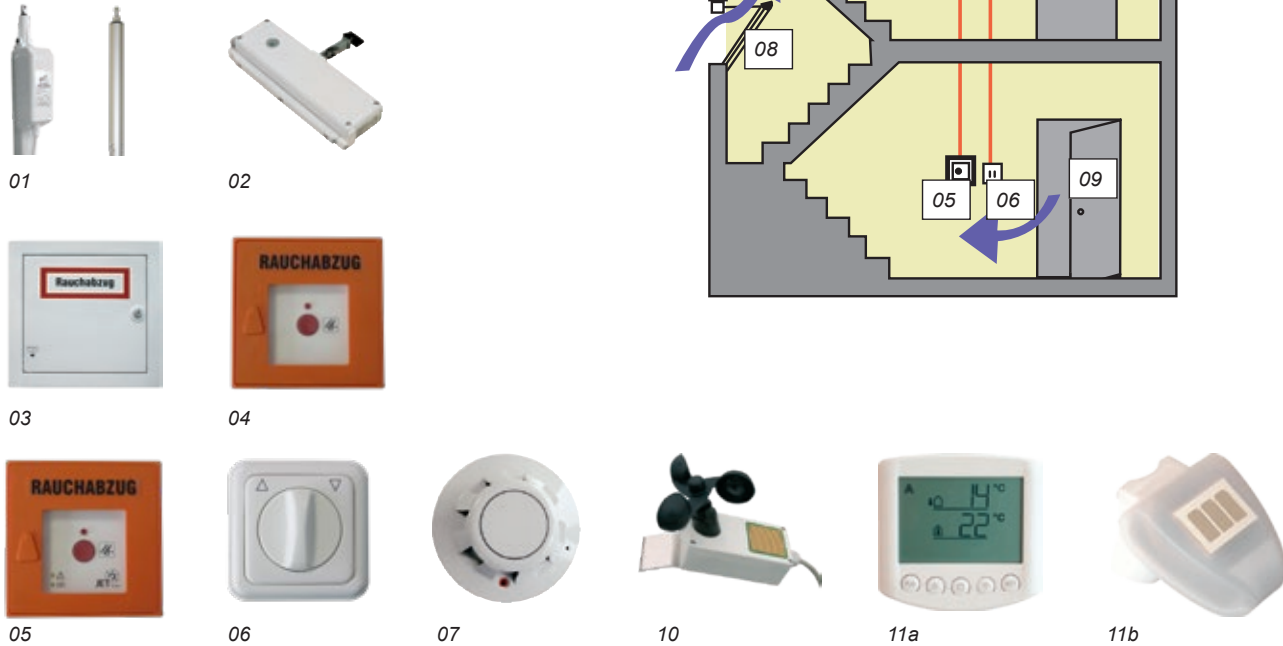

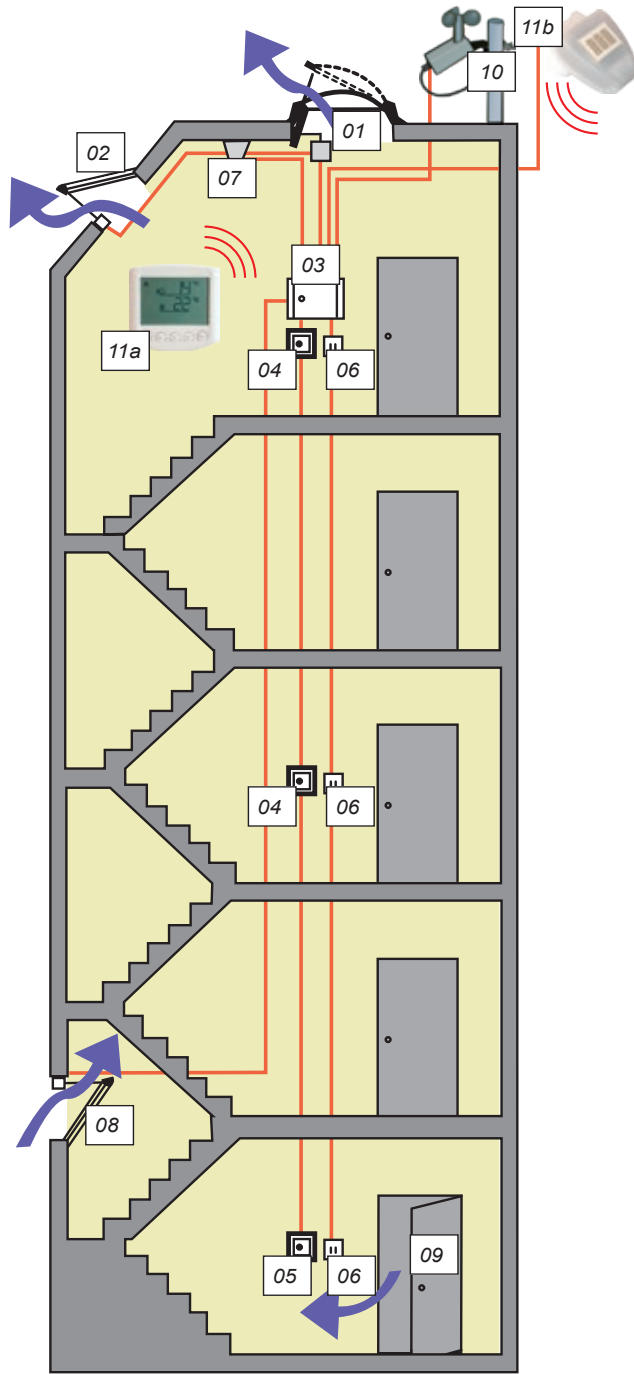

ventilation rotary switch (upon/ under plaster)

**JET-staircase 24V SHEV set:**

- 01. JET-light dome, openable with JET-SHEV motor opener 24 V (spindle drive)
- 02. alternative to 01: roof-top window with JET-SHEV motor opener 24 V (chain drive)
- 03. JET-SHEV motor central 24 V
- 04. JET-SHEV DIN secondary switch
- 05. JET-SHEV DIN main release switch
- 06. JET-ventilation rotary switch
- 07. JET-smoke detector
- 08. air intake opening: casement with JET-chain drive 24 V
- 09. alternative to 08: door with locking device as "manual air intake"
- 10. JET-wind/rain sensor
- 11. alternative to 10: JET-SMARTCONTROL AIR 24 V consisting of:
  - 11a. control unit and
  - 11b. weather station
